About The Scenario

City of Port Hyrtin is a scenario for Realmz 6.2. To play this scenario, you need...

1. Registered version of Realmz 6.2 or higher.
2. Registration of this scenario.
3. Strong party. Recommended Level of this scenario is 145.
4. Your skill, in both battles and encounters. I recommend you play this scenario after you have completed at least one of other advanced scenarios, such as Destroy the Necronomicon, Griloch's Revenge, White Dragon, and so on.

Contact Me

Since I don't have my own web page, please contact me in either e-mail or air mail.

Story

For a long time, city of Port Hyrtin, and the whole Kingdom of Hyrtin has been in peace.

Today, the Kingdom is not the Kingdom as it has been. Thanks to mighty Army, inside Port Hyrtin is still kept in peace. But, its surrounding area is deteriorating. In one village, the villagers are living with continuous Red Dragon menace. In another village, Trolls threaten and hurt the villagers all the time.

And one day, one sad story ran throughout the Kingdom.

There was an innocent, talented, and beautiful 15-year-old princess named Emma. One day, she was kidnapped on the Old South Road when she traveled to the great lake with her father, namely, King Hyrtin. Since then, King Hyrtin does not appear in front of citizens. Even though Port Hyrtin is kept in peace by the King's strong Army, citizens began to feel fear.

There has been a legendary sword called Alexander in this region. But, it has disappeared suddenly. Rumor says it was stolen, but nobody knows the truth. Just one thing is obvious - Alexander does not work at all against this strong evil, for it is said the sword was held by a very mighty warrior.

Also, it is said that four magical stones, which might be able to terminate this evil, are sleeping somewhere in this region. But few know what they are, and where they are.

Anyway... why monsters are increasing rapidly in this Kingdom?

Hearing the news, you head to Port Hyrtin. It appears to be quite peaceful inside the city. What's on earth happening in this city?

Your Mission

Save Princess Emma. Retrieve Alexander. Collect four magical stones. The source of the evil might be quite strong this time, so get a mighty new sword from those

materials. Defeat the sources of the evil once and for all with the sword. Those are not easy tasks, for little has known about this strong evil, legendary sword, and magical stones.

Registration

You can test-play up to a certain point, but you have to register if you want to play beyond there.

I don't recommend you send me cash via ordinary first-class mail, but still you can. I have no responsibilities over registration forms and fees lost in the post.

Dual-License Registration Program

Dual-License Registration Program is started along with the release of Dagger of Shine.

You have to download each scenarios independently, but you can resister both City of Port Hyrtin and Dagger of Shine scenarios simultaneously as if it were one scenario.

Also, Dual-License Registration offers you discounted price.

Mail this completed form with payment to:

Scenario Tips

In this section I'll provide some tips for this scenario. You don't have to read this section. Rather, do NOT read whole section before you play. This section is a large spoiler. Don't read this section until you have tried everything you can come up with and still are stuck.

In this section I don't provide ANY X:Y combinations. I don't mention everything in this

scenario, either. It is your work. The purpose of this section is merely to help your business to complete the scenario, not to explain everything about this scenario.

Warning Again! This section is a really large spoiler.

Inside and Around the City

Inside the City of Port Hyrtin

1. North Coast Inn. It is where you start your adventure. The Old South Road also starts there. Ground floor is tavern and you can get some information there. Be sure you meet Rachel in her room. Do not attack her or try to steal her money. You won't be able to complete this scenario if you do those.
2. Port. To pass the port gate you have to pay 20 gems (NOT gold) or fight 100 pirates. You will have to pay each time you pass the gate until you fight against them and defeat them.
3. Castle. You can't get into the castle until you return Princess Emma alive. In other words, you have to keep Princess Emma until you come back to the castle... and complete this scenario.
4. Blacksmith. He sells his swords at lower price (just than general shop). You have to visit him AFTER you have got Alexander+4 and all four Froststones.
5. Library. You can find a magicak book if you search inside the library. Also you can get some information and a map from the librarian. Don't practice fighting there... it is common sense, isn't it? You will be kicked out and all of your equipment will be void if you do.
6. Magic & Map Shop. You can get some magical stuff and critical maps.

Serpent Isle

You don't have to do this quest. It is just an extra quest. You can get Serpent's Head and Eye of the Serpent after the battle.

Harpy Forest

Harpies stole the Blacksmith's tools. You have to beat Queen Harpy to retrieve his tools. Watch out for their charm.

In the Eastern part of this forest Dark Elves are fighting. You will find a nice bow if you search around in the area. Also, you may encounter random event battle between Dark Elven Master and Port Hyrtin Army. The Master has a very nice weapon.

Somewhere in this forest you will find a trap door. If you get down to the underground there is Brown Dragon Cave.

Brown Dragon Cave

Brown Dragons are living in the deepest part of the cave. It is seemed several adventurers have challenged but all were killed.

In the secret cave behind where you fight against Brown Dragons you will find a very nice sword, as long as some potions and money.

Greckle Cave

The cave is in the Western mountain, the upstream of the river.

Inside you will find Greckle is living with Green Dragons it has summoned. Fight well.

Beyond the secret criff there is a passage to a small open area on the surface. there you will find the Great Wizard. You have to keep him alive in order to remove the curse of the Ancient Temple and approach to it.

Open Area

There are some random encounters. None of them are related to scenario completion, but you can get some rewards after those fun battles.

You might find a girl attacked by High Master thieves. If you help her and take her back to her home alive you will get a very nice, beautiful shield.

Sunken Ship

First, I mention you don't have to complete this quest. Do this quest if you really want to do.

How to start: Go to the tavern on the Ground Floor of North Coast Inn. Meet a man asking you about the Sunken Ship. Agree with his proposal to give the treasure to him.

1. Levers. You can find two levers in the "control room". One brings you money when you pull it. The other one is trap.

2. Captain's Room. At the entrance you will be brought to the combat. It is with many Ghosts, Spectres, and Phantoms, all surprise you. From the Captain's Room you can get a secret room. Inside the secret room you can get cool stuff.

3. Seaman's Rooms. There's nothing to do.

4. Storage. Many undead monsters will appear (unless you are using Sentry spell). From a trap door you can get the Treasure Room. You have to use "search" button to find the trap door.

5. Treasure Room. You can find Sunken Ship Treasure in this room. Take the chest. Watch out, 15 Phantoms will surprise you after you have taken the chest. Behind the

chest is the door to get out of the ship. You have to cast Waterworld spell before you get through the door... otherwise you'll get drown and die.

Ancient Temple

This temple plays very important role in this scenario. Your quest starts here and ends here.

The gate of the Ancient Temple is closed until you find the Great Wizard and bring him there. After that, the wall and gate disappear and you can approach to the temple at any time.

Ground Floor - Indoor

Nothing to do in this floor. Just find secret passage to the dungeon.

1st Basement

Some undead monsters appear in this floor, yet it is pretty straightforward. Just this dungeon is 3D view only.

2nd Basement

There is a large prayer room. In the center of the prayer room you can see another small room. Inside the small room you will find (First) Dark Master. He is not so tough, but he casts Annihilate x5 when he dies. Be careful. Also, He uses Alexander+4 during the combat. After you beat him, the sword will be yours.

At the southwest corner of the prayer room you can find an archway. It is covered with magical flame. You can't pass here until you get Arctic Alexander+6. In other words, you have to come back here and get through here after you have got Arctic Alexander+6

Beyond the archway you can find two doors side-by-side. If you turn right there is a room guarded by total of 30 Stone Ropers. Be careful for their stings. Beyond the secret wall you will find a secret room with a crystal. If you touch the crystal 6 of your parchments turns into 6 scrolls of Revive Dead.

If you turn left and go to another room, the voice tells you to choose the right way. If you choose the right way you can get the stairs to the 3rd Basement. Otherwise you will die.

3rd Basement

The main characteristics of this floor is endless spiral passage. Its wall and roof are covered with magical flame, which occasionally gives you a slight damage. The stairs to the 4th basement is hidden in the secret passage.

Also there are 6 rooms occupied by monsters. Fun battles. And you can get very nice stuff in each room after the battle. All of them are scenario specific items. I don't tell you what are living and what you can get. You'll see it.

Tips from the wise. Don't undervalue poison slimes. They cast Poison Cloud x1 when they die, in addition to regeneration and poison attack.

4th Basement

This is the floor of teleporters. If you choose well you have to take only 3 teleporters. Make a map. It will be easy if you use Wizard Eye spell.

5th Basement

This is the floor of "maze of doors". Your compass does not work. X:Y display does not work. There are turntables and pits. Again, make a map. Save before you fall. Wizard Eye spell is not enough here.

6th Basement

Those who have completed 5th Basement: just go down the passage. There is no monsters in this passage. Take a good rest before you take the stairs to the 7th Basement.

Those who have fallen down from 5th Basement (i.e. pit): Search for the stairs to come back to the 5th Basement. There are LOTS of random monsters in this floor. Sentry spell doesn't work.

7th Basement

(Second) Dark Master is waiting for you with Dark Knights. Battle is not so tough as you might think, just tougher than the first Dark Master, but this time the Dark Master casts Banish x7 when he dies.

After the battle, step into the portal. You will get the Upper Floor of the Ancient Temple in the Dark Valley.

Ancient Temple in the Dark Valley

Upper Floor

You reach there when you take the portal of the 7th Basement of Ancient Temple. Just that. Nothing to do there.

Ground Floor

It is the entrance of the Dark Valley. Take a rest if your party is tired, seriously wounded, or has almost used up their spell points. Prepare scrolls. Bunch of monsters

are waiting for you outside. Sentry spell does not work in entire Dark Valley.

Basement

You can see lava there. First, USE Mellia's crown. Then, you can pass the lava. Take the portal. Cast Teleport Party. The portal teleports you to the Realmz.

The string says "you are unconcious" but don't worry. Just you are "unconcious" for 3 game days. Ancient Temple has broken down. You can't go back to the Dark Valley after you come back to the Realmz. Congratulations! Your quest is over. Head to the King's Castle. You will be rewarded by one of the following... swords, armors, magical items, or gems.

The South Land

Village of Drenn

Village of Drenn is guarded by Iron Golems. You have to beat them to get into the village.

There the Elder ask you to return his Bible. If you do so the Elder offers you free healing.

Birlaute's house is in the north of Drenn. If you bring Kobold King's head and keep Birlaute alive, his wife will give you Leaf of Apollo.

Town of Lowdin

You have to visit town tavern. There you can get some important information.

The tavern is also the starting point of Kobold King hunt. You have to talk to the master, ask about the Northwest, and decide which one you talk to - Birlaute or General of Forest Knight. You can talk only to one of them. If you take sides of Forest knight battles will be easier, but...

Town of Salina

Be sure you have visited the town hall before you leave the town. They will give you VERY important information.

From there you can take the ship to the Great Lake.

Kobold Kingdom

It is extra quest. Yet You can gain some treasures.

To start this quest you have visit town tavern of Lowdin and decide which side you take. Until then the gate of the kingdom is closed.

If you take sides with Birlaute, ALL battles are enemy's surprise inside the Kingdom. Be careful.

Troll Cave

It is totally extra quest. Your objective here is retrieve the Elder's Bible.

The Bible is guarded by King Troll. Battle is surprise.

After that you have to open the chest. It is trapped.

Red Dragon Horde

You can do following four quests - Red Dragon Horde, Great Lake Cavern, Top of the World Castle, and the Death Valley - by any order. Just you have to do all four quests.

Red Dragon Horde is far upstream of the waterfall. Cast Superfly, Fantastic Wings or Teleport Party to get the upper side of the waterfall. The necklace also works. After that just you have to go up, up, and up along the river.

Red Dragons are living near the source of the river. There four Gold Dragons are fighting against Red Dragons. Help them. Cast healing spells on them after the battle.

Froststone is held by a Gold Dragon. It can cast Shiver x7 twelve times.

Great Lake Cavern

You can reach this cave only by ship. Take a ship from Salina. Be careful for Frost Dragons and Serpents living in this lake.

Entrance off this cave is covered by ice. Cast fire-based spells. Use Sting+3, Flameherat+2, Staff of Merlin+3, or Flask of Oil. Any of those works.

To get into the cave of Froststone you have to get through the cave filled with water. Cast Waterworld or Watergate to do so.

The location of watery cave is shown on the map. You can get the map in the "room" beyond the long, long, long river tunnel. Map is inside the chest with Potion of waterworld. Of course it is guarded by monsters.

You can get Froststone after the battle against White Wyvern. It can cast Deep Freeze x7 twelve times.

Top of the World Castle

Top of the World Castle is located on the summit of high mountain. It is "Top of the World" as it says.

You have to get through 4-story cavern to get to the castle. Inside the cave you will encounter many monsters.

1st Floor

The underground bridge? Beyond the secret passage you will find a shack. Inside the shack you will see 9 levers. You have to pull 1st, 2nd, 6th , and 8th lever (from the left). If you pull the 4th lever you will get a nice broach, gold, and gems. Others are all traps.

2nd Floor

The stairs are beyond the secret passage. Inside the secret cave it is safe zone. Take a rest.

Shoulder of the mountain

The gate is guarded by a dozen of Anti'ids. Fight well.

3rd Floor

You might find a chest in a "room" filled with bats. Those bats attack you right after you have taken the Bracer of Blitz+27 (SS).

To get through the standing wall you have to dig your own tunnel under the wall. Cast Dig Hole or Shape Earth.

4th Floor

You will have to beat Giants guarding the gates. First you will have fight with Fire Titans, then Odins. They are really strong.

The Castle

As you step inside the castle you have to fight Quelinne, the Queen of this castle. Each round her body splits. Only one is true figure. Others are just mirage. Which one? I can't tell you. I can't even predict it. It's random.

Beyond the secret passage you will find a room with a pool. On the poolside you will find a Froststone. It can cast Plane of Ice x7 twelve times.

To get out of the castle you have to dive into the pool. Be sure you have cast either Waterworld or Watergate before you do... otherwise you'll get drown and die.

Death Valley

Go down, down, and down the Old South Road until you reach the oasis city of Arrim.

In Arrim the first place you have to go is the Castle. It is the end of the Old South Road. Offer the King to kill the spiders.

Then, head to the forest east of Arrim. In the easternmost cave you will find evil old spiders... of course, including that bitch.

After that go back to the castle and get Cane of Sandstorm. Use this cane to get to the deepest part of the Death Valley. You will take damages from excessive heat there. You may encounter monsters once in a blue moon. You can't avoid those random encounters. Sentry spell doesn't work.

To get into the castle you have to fight Guardian spiders first, then Holsam, King of this castle. He loves to collect statues of brave warriors. Watch out for his Statue spell.

Beyond the secret passage you will find stairs. Then you will find secret statue room upstairs. Inside the room one statue is kept independently. Cast Flesh spell on this statue, and you will get Edward as NPC. Return to Port Hyrtin with him and meet Rachel in the North Coast Inn. You must keep him alive until then. You will get a Froststone from Rachel if you do so. It can cast Frostbite x7 twelve times.

Dark Valley

There is nothing to do in the valley. Just go straight to the Mellia's Castle.

Sentry spell does not work here.

Water of river and lake is poisonous. Watch out.

Before you enter the castle, on the bridge, you have to fight Gaurson, the General of Mellia's Army. He approaches to you with ten Dark Knights. He is pretty strong.

Mellia's Castle

First you have to enter a large room. Inside the room you will encounter battles with Golems. Sentry spell does not work here. Go up, up, and up until you find six levers. You can pull only one lever. Any of those levers work. What happens then? You will find it.

After that? It's on you. Oh, let me tell you one more thing. Don't forget to take Mellia's Crown after the battle.

About the Author

I am Ryota Yashima, 23-year-old, fifth-year business major senior of International Christian University at Tokyo. Also, I have been in Columbus, Ohio, USA as an exchange student at The Ohio State University for a year. It is only one overseas experience for me. So please forgive me even if you find some spelling and grammatical errors.

Though my major is not computer, I play with my Mac as one of my hobbies. I love to create something new - I like to take pictures, I write songs, and... I have written two Divine scenarios so far. Since I met Realmz, I have owned it for two years... but actually I have played it about a year, for I didn't take my Mac to Columbus.

Yet I have registered 5 scenarios and written 1 scenario before I release this scenario. Realmz is the coolest RPG I have ever played. (I have played Dragon Warrior, Final Fantasy, Wizardry... but Realmz is better than any of those, at least for me). My favorite scenario is Griloch's Revenge. This scenario is quite dramatic, but not one-line. It has many fun battles and encounters. And now, Realmz is the RPG to write my own scenario, rather than just to play with.

Okay, what else? Mmm... I am an Ohio State Buckeyes fan. All of their football games are exciting. I am really glad to hear men of scarlet and gray are driving across the field as usual (sorry, Fantasoftware... Congratulations on your Wisconsin Badgers' victory in 1999 Rose Bowl). Buckeyes also won the Sugar Bowl, yeah!!!... And guess what, the Buckeyes men's basketball team played its first Final Four game in 31 years! What a season...

Lastly, please let me show you my links.

Thank you for reading this document up to here. Probably I have written too many things on this document. Please enjoy this scenario. Please e-mail (or air mail) me for the comments and bug reports. Thank you.

What's New?

Version 3.3 (Released 7/20/99)

- added a cave. There you will fight against brown dragons and find a very nice sword.

- fixed some battles which allies involve. CoPH is now Realmz 6.2 compliant.
- fixed some bugs.

Version 3.2 (Released 4/3/99)

- completed spell check via string extractor & spell checker.
- fixed the problem that a string disappears along with asking a question.

Version 3.1 (Released 3/22/99)

- added Dark Elves. They live in the Eastern part of the Harpy forest.
- incorporated brand-new items that are available in Realmz 6.0 or higher.
- changed format. CoPH is now Realmz 6.0 compliant.

Version 3.0 (Released 3/7/99)

- added random encounters on the first land level.
- added a new quest, Greckle cave. Now it is the first quest you have to complete.
- added some monsters and NPCs.
- fixed a bug of the tavern in the town of Lowdin.

Now you can test-play more parts before registration.

- changed registration passwords, because of increasing number of pirates.

Version 2.1 (Released 2/14/99)

- fixed an encounter at the waterfall of Red Dragon quest. Superfly and Necklace work now.
- eliminated capture/restore equipments in the library. It adds the reality to the library, but causes some big problems, so I abandoned it.
- discarded "The End" splash. Scenario became a little bit lighter.
- added random teleporters in the 1st basement of the Ancient Temple.
- changed six optional battles in the 3rd basement of the Ancient Temple. Now those are battles over random monsters. Also, you can't get the treasure if you flee from the battle.
- added a treasure in the library.
- started dual-license registration program. It allows you register both City of Port Hyrtin and Dagger of Shine simultaneously at a discounted price.

Version 2.0.1 (Released 1/24/99)

- added descriptions on scenario-specific items.

Version 2.0 (Released 1/19/99)

- added a new monster, Hellhound. It looks identical to a Black Wolverine, but it casts flame breath.
- corrections in NPCs. Princess Emma, Birlaute, Edward, and Rachel do NOT increase their toughness level in Monster Monsters/Mega Monsters set. (Does anybody dare play this scenario with those monster sets?)
- change in monster icons. Icon of Dark Master has changed.

- change in item icons. Icons of Froststones, and Arrim Ale have changed.
- bug fixes in rogue encounter.
- bug fix in Port Hyrtin General Shop. It used to be "erased" after the completion of Red Dragon quest (I don't know why). I fixed it by replacing the Action Point with new one.
- one correction in the Sunken Ship. You have to "serach" for the trap door to get into the treasure room. It is no longer a secret point.
- added information of coming scenario, Dagger of Shine.

Version 1.3 (Released 1/1/99)

- corrections in registration. You can no longer skip registration by editing the scenario via scenario editor.
- some corrections in complex encounters.
- A Happy New Year!

Version 1.2 (Released 12/24/98)

- bug corrections. You can't escape from Quelinne battle and Holsam battle anymore.
- some corrections about monster. Kobolds don't paralyze you anymore. Phantoms use Plane of Fire spell... etc.

Version 1.1 (Released 12/21/98)

- some minor changes and corrections.

City of Port Hyrtin
