

City of Port Hyrtin

Version 3.3 · by Ryota Yashima · 1999

(Edited by Samuel J. Wood in 2026)

The recommended level for this scenario is 145. I recommend you play this scenario after you have completed at least one of other advanced scenarios, such as Destroy the Necronomicon, Griloch's Revenge, or White Dragon.

For a long time, the city of Port Hyrtin, and the whole Kingdom of Hyrtin has been At peace. Today, the Kingdom is not the Kingdom it once was. Thanks to a mighty Army, peace is still maintained in Port Hyrtin itself. But the surrounding area is deteriorating. One village is menaced by red dragons. Another, by trolls.

One day, Princess Emma was kidnapped on the Old South Road when traveling to the great lake with her father, King Hyrtin. The king has not appeared in public since then. Even though Port Hyrtin is kept in peace by the army, the citizens are growing fearful.

There was once a legendary sword called Alexander in this region. Rumor says it was stolen, but nobody knows the truth. However, Alexander alone will not be enough to defeat the evil that plagues the land. The sword must be wielded by a mighty

warrior.

Also, it is said that four magical stones, which might be able to stop this evil, are hidden somewhere in this region.

Eager for adventure, you head to Port Hyrtin.

Your Mission

Save Princess Emma. Retrieve the legendary sword, Alexander. Collect four magical stones. Defeat the source of evil once and for all with the sword.

These are not easy tasks, for little has known about the nature of your enemies, the legendary sword, or the magical stones.

Scenario Tips

In this section I'll provide some tips for this scenario. Don't read this section until you have tried everything you can come up with and still are stuck.

Inside and Around the City

Inside the City of Port Hyrtin

1. North Coast Inn

This is where you start your adventure. The Old South Road also starts here. The ground floor is a tavern and you can get some information there. Be sure you meet Rachel in her room. Do not attack her or try to steal her money. You won't be able to complete this scenario if you do.

2. Port

To pass the port gate you have to pay 20 gems (NOT gold) or fight 100 pirates. You will have to pay each time you pass the gate until you defeat them.

3. Castle

You can't get into the castle until you return Princess Emma alive. In other words, you have to rescue Princess Emma and keep her safe until you come back to the castle.

4. Blacksmith

He sells his swords at a low price. You have to visit him AFTER you get Alexander and all four froststones.

5. Library

You can find a magic book if you search inside the library. Also you can get some information and a map from the librarian. Don't fight in the library... common sense, right? You will be kicked out.

6. Magic & Map Shop

You can get some magical stuff and critical maps.

Serpent Isle

This is an optional quest. You can get the Serpent's Head and the Eye of the Serpent after the battle.

Harpy Forest

Harpies stole the Blacksmith's tools. You have to beat the Queen Harpy to retrieve his tools. Watch out for their charm spells.

In the eastern part of this forest dark elves are fighting. You will find a nice bow if you search around in the area. Also, you may encounter a random event battle between the dark elven master and the Port Hyrtin army. The master has a very nice weapon. Somewhere in this forest you will find a trap door. There is a brown dragon cave underground.

Brown Dragon Cave

Brown dragons are living in the deepest part of the cave. Several adventurers have challenged but all were killed. In the secret cave behind where you fight against the brown dragons you will find a very nice sword, as long as some potions and gold.

Greckle Cave

The cave is in the western mountains, upstream. Inside you will find the Greckle is living with Green Dragons it has summoned. Beyond the secret cliff there is a passage to a small open area on the surface. There you will find the Great Wizard. You have to keep him alive in order to remove the curse of the Ancient Temple and approach it.

Open Area

There are some random encounters. None of them are related to scenario completion, but you can get some rewards after those fun battles. You might find a girl being attacked by thieves. If you help her and take her back to her home alive you will get a special shield as a reward.

Sunken Ship

This quest is optional. How to start: Go to the tavern on the Ground Floor of the North Coast Inn. Meet a man asking you about a sunken ship. Agree with his proposal to give the treasure to him.

1. Levers

You can find two levers in the "control room." One brings you money when you pull it. The other one is trap.

2. Captain's Room

There will be a surprise battle with ghosts, spectres, and phantoms. From the Captain's Room you can get into a secret room. Inside the secret room you can get cool stuff.

3. Seaman's Rooms

Nothing here.

4. Storage

Many undead monsters will appear (unless you are using the Sentry spell). From a trap door you can get to the treasure room. You have to use the "search" button to find the trap door.

5. Treasure Room

You can find the sunken ship treasure in this room. Take the chest. Watch out, 15 Phantoms will surprise you after you have taken the chest. Behind the chest is the door to get out of the ship. You have to cast the Waterworld spell before you go through the door... otherwise you'll drown and die.

Ancient Temple

This temple plays a very important role in this scenario. Your quest starts here and ends here. The gate of the Ancient Temple is closed until you find the Great Wizard and bring him there. After that, the wall and gate disappear and you can approach the temple at any time.

Ground Floor - Indoor

Nothing to do on this floor. Just find the secret passage to the dungeon.

1st Basement

Some undead monsters appear in this floor, but it is pretty straightforward.

This dungeon is 3D view only.

2nd Basement

There is a large prayer room. In the center of the prayer room you can see another small room. Inside the small room you will find the (first) Dark Master. He is not so tough, but he casts Annihilate x5 when he dies. Be careful. Also, He uses the sword, Alexander, during the combat. After you beat him, the sword will be yours. At the southwest corner of the prayer room you can find an archway. It is covered with magical flame. You can't pass here until you get Arctic Alexander.

Beyond the archway you can find two doors side-by-side. If you turn right there is a room guarded by a total of 30 Stone Ropers. Be careful of their stings.

Beyond the secret wall you will find a secret room with a crystal. If you touch the crystal 6 of your parchments will turn into 6 scrolls of Revive Dead. If you turn left and go to another room, the voice tells you to choose the right way. If you choose the right way will find the stairs to the 3rd Basement. Otherwise you will die.

3rd Basement

This floor is an endless spiral passage. Its walls and roof are covered with magical flame, which occasionally damage you. The stairs to the 4th basement are hidden in a secret passage. Also there are 6 rooms occupied by monsters. Fun battles. And you can get very nice stuff in each room after the battle. All of them are scenario specific items.

Tip: Don't underestimate poisonous slimes. They cast Poison Cloud x1 when they die, in addition to regeneration and poison attack.

4th Basement

This is the floor of teleporters. If you choose well you have to take only 3 teleporters. Make a map. It will be easy if you use the Wizard Eye spell.

5th Basement

This is the floor with a "maze of doors". Your compass does not work. X:Y display does not work. There are turntables and pits. Again, make a map. Save before you fall. The Wizard Eye spell will not be enough here.

6th Basement

Those who have completed 5th Basement: just go down the passage. There are no monsters in this passage. Take a good rest before you take the stairs to the 7th Basement. Those who have fallen down from 5th Basement (i.e. pit): Search for the stairs to come back to the 5th Basement. There are LOTS of random monsters in this floor. The sentry spell doesn't work.

7th Basement

The (second) Dark Master is waiting for you with dark knights. The battle is not as tough as you might think, just tougher than the first Dark Master, but this time the Dark Master casts Banish x7 when he dies. After the battle, step into the portal. You will teleport to the Upper Floor of the Ancient Temple in the Dark Valley.

Ancient Temple in the Dark Valley

Upper Floor

You arrive here when you take the portal from the 7th Basement of the ancient temple. Nothing to do here.

Ground Floor

This is the entrance of the Dark Valley. Take a rest if your party is tired, seriously wounded, or has almost used up their spell points. Prepare scrolls. A bunch of monsters are waiting for you outside. The Sentry spell does not work anywhere in the Dark Valley.

Basement

You can see lava here. First, USE Mellia's crown. Then, you can pass the lava. Take the portal. Cast Teleport Party. The portal teleports you to the Realmz. The string says "you are unconscious" but don't worry. You are just "unconscious" for 3 game days. The ancient temple has broken down. You can't go back to the Dark Valley after you come back to the Realmz.

Congratulations! Your quest is over. Head to the King's Castle. You will be rewarded with one of the following... swords, armors, magical items, or gems.

The South Land

Village of Drenn

The village of Drenn is guarded by iron golems. You have to beat them to get into the village. There the elder ask you to return his Bible. If you do so the elder offers you free healing. Birlaute's house is in the north of Drenn. If you bring the kobold king's head and keep Birlaute alive, his wife will give you Leaf of Apollo.

Town of Lowdin

You have to visit the town tavern. There you can get some important information. The tavern is also the starting point of the kobold king hunt. You have to talk to the master, ask about the Northwest, and decide which one you talk to - Birlaute or the forest knight general. You can talk only to one of them. If you take the side of the forest knights battles will be easier, but...

Town of Salina

Be sure you have visited the town hall before you leave town. They will give you VERY important information. From there you can take the ship to the Great Lake.

Kobold Kingdom

This is an extra quest.

To start this quest you have to visit the town tavern of Lowdin and decide which side you take. Until then the gate of the kingdom is closed. If you take sides with Birlaute, ALL battles are surprise battles inside the kingdom. Be careful.

Troll Cave

It is a totally optional quest. Your objective here is retrieve the elder's Bible. The Bible is guarded by the troll king. It's a surprise battle. After that you have to open the chest. It is booby-trapped.

You can do the following four quests - red dragon horde, Great Lake Cavern, the Castle at the Top of the World, and the Valley of Death - in any order. However, you must do all four quests.

Red Dragon Horde

The red dragon horde is far upstream of the waterfall. Cast Superfly, Fantastic Wings or Teleport Party to get to the upper side of the waterfall. The necklace also works. After that you just have to go up, up, and up along the river. Red dragons are living near the source of the river. There, four gold dragons are fighting against the red dragons. Help them. Cast healing spells on them after the battle. A froststone is held by a gold dragon. It can cast Shiver x7 twelve times.

Great Lake Cavern

You can reach this cave only by ship. Take a ship from Salina. Be careful of frost dragons and serpents living in the lake. The entrance to this cave is covered by ice. Cast fire-based spells. Use Sting, Flameheart, Staff of Merlin, or Flask of Oil. Any of these will work. To get into the cave of with a froststone, you have to get through a cave filled with water. Cast Waterworld or Watergate to do so. The location of the watery cave is shown on the map. You can get the map in the "room" beyond the long, long, long river tunnel. The map is inside the chest with the potion of waterworld. Of course it is guarded by monsters. You can get a froststone after the battle against the white wyvern. It can cast Deep Freeze x7 twelve times.

Castle at the Top of the World

The Castle at the Top of the World is located on the summit of a high mountain. It is at the "Top of the World." You have to get through a 4-story cavern to get to the castle. Inside the cave you will encounter many monsters.

1st Floor

The underground bridge? Beyond the secret passage you will find a shack. Inside the shack you will see 9 levers. You have to pull the 1st, 2nd, 6th , and 8th lever (from the left). If you pull the 4th lever you will get a nice broach, gold, and gems. Others are all traps.

2nd Floor

The stairs are beyond the secret passage. Inside the secret cave it is safe zone. Take a rest.

Shoulder of the mountain

The gate is guarded by a dozen Anti'ids.

3rd Floor

You might find a chest in a "room" filled with bats. Those bats attack you right after you have taken the Bracer of Blitz. To get through the standing wall you have to dig your own tunnel under the wall. Cast Dig Hole or Shape Earth.

4th Floor

You will have to beat the giants guarding the gates. First you will have fight with fire titans, then Odins. They are really strong.

The Castle

As you step inside the castle you have to fight Quelinne, the queen of this castle. Each round her body splits. Only one is her true form. The others are just an illusion. Which one? I can't tell you. I can't even predict it. It's random. Beyond the secret passage you will find a room with a pool. On the poolside you will find a froststone. It can cast Plane of Ice x7 twelve times.

To get out of the castle you have to dive into the pool. Be sure you have cast either Waterworld or Watergate before you do... otherwise you'll drown and die.

The Valley of Death

Go down, down, and down the Old South Road until you reach the oasis city of Arrim. In Arrim, the first place you have to go is the castle. It is at the end of the Old South Road. Speak to the king, and offer to kill the spiders. Then, head to the forest east of Arrim. In the easternmost cave you will find evil spiders... of course.

After that go back to the castle and get the Cane of Sandstorm. Use this cane to get to the deepest part of the Death Valley. You will take damage from the extreme heat there. You may encounter monsters once in a blue moon. You can't avoid these random encounters. The sentry spell doesn't work. To get into the castle you have to fight the guardian spiders first, then Holsam, King of this castle. He loves to collect statues of brave warriors. Watch out for his Statue spell. Beyond the secret passage you will find stairs. Then you will find a secret

statue room upstairs. Inside the room one statue is kept independently. Cast Flesh spell on this statue, and you will get Edward as an NPC ally. Return to Port Hyrtin with him and meet Rachel in the North Coast Inn. You must keep him alive until then. You will get a froststone from Rachel if you do so. It can cast Frostbite x7 twelve times.

Dark Valley

There is nothing to do in the valley. Just go straight to Mellia's Castle. The sentry spell does not work here. The river and lake are poisonous. Watch out. Before you enter the castle, on the bridge, you have to fight Gaurson, the general of Mellia's army. He approaches to you with ten dark knights. He is pretty strong.

Mellia's Castle

First you have to enter a large room. Inside the room you will encounter battles with golems. The sentry spell does not work here. Go up, up, and up until you find six levers. You can pull only one lever. Any of those levers work. What happens next? You will find out. After that? It's on you. Oh, let me tell you one more thing. Don't forget to take Mellia's Crown after the battle.

About the Author

I am Ryota Yashima, 23-year-old, fifth-year business major senior of International Christian University at Tokyo. Also, I have been in Columbus, Ohio, USA as an exchange student at The Ohio State University for a year. It is only one overseas experience for me. So please forgive me even if you find some spelling and grammatical errors.

Though my major is not computer, I play with my Mac as one of my hobbies. I love to create something new - I like to take pictures, I write songs, and... I have written two Divine scenarios so far. Since I met Realmz, I have owned it for two years... but actually I have played it about a year, for I didn't take my Mac to Columbus.

Yet I have registered 5 scenarios and written 1 scenario before I release this scenario. Realmz is the coolest RPG I have ever played. (I have played Dragon Warrior, Final Fantasy, Wizardry... but Realmz is better than any of those, at least for me). My favorite scenario is Griloch's Revenge. This scenario is quite dramatic, but not one-line. It has many fun battles and encounters. And now, Realmz is the RPG to write my own scenario, rather than just to play with.

Okay, what else? Mmm... I am an Ohio State Buckeyes fan. All of their football games are exciting. I am really glad to hear men of scarlet and gray are driving across the field as usual (sorry, Fantasoftware... Congratulations on your Wisconsin Badgers' victory in 1999 Rose Bowl). Buckeyes also won the Sugar Bowl, yeah!!!... And guess what, the Buckeyes men's basketball team played its first Final Four game in 31 years! What a season...
