

Elemental Strife

by Mike Leglate · Part 1 of the Elemental trilogy

(Edited by Samuel J. Wood in 2026)

The city of Crosswald was once a single, thriving hub where the followers of every element came together in peace to trade. That peace is gone. Without warning or explanation, the four Elemental Lords each claimed a quarter of the city for their own, raising walls between them almost overnight. Former mayor Todd Silverbeard, once a proud statesman, now wanders the neutral zone in rags, the only remnant of the Crosswald that used to be.

Beyond the walls, an elemental war rages.

Silverbeard believes there is still a chance for peace. If only someone brave enough would carry his plea to each of the four Elemental Lords and convince them to set aside their grudges and meet, together, on the neutral ground of Crosswald. It is a long and dangerous road: past the Order's Inner Circle and its fire-bound guardians, through Mud Dwarf tunnels and mining pits, along riverways patrolled by undead sentries, and into a ritual of the sea meant only for the truly enlightened. But if the four can be gathered in one place at last, there may yet be an end to the strife tearing the elemental domains apart.

Your task: journey to each of the four elemental domains, win the trust of their Lords and bring them together in Crosswald before war destroys the Realmz.
