

Spires of Steel

Version 1.1 · Jesse Rechel

(Edited by Samuel J. Wood in 2026)

Tempted by the promise of glory as a first-rank scout in Tashivab's army, you were sent to hunt orcs on a forgotten, out-of-the-way island. Instead you meet Ranloth, a god of the blue blood, whose voice fills your mind with a warning no mortal wants to hear: beings from beyond the stars are coming, bearing weapons beyond magic, beyond steel, beyond the gods themselves — weapons that will one day be turned against everything you know. Ranloth cannot follow where he means to send you. He can only offer a handful of treasure and four words: seek the spires of steel.

A blinding light drops you not into another corner of the Realmz, but into a rusted, neon-lit future — a sprawling metropolis called Central City, ruled by an armored police state, patrolled by machines, and choked with the smoke of a fusion plant powerful enough to buy a kingdom. Here magic means nothing. Gold buys blasters from twitchy pawnbrokers, gangs murder over stolen "credit slides," and the very robots built to serve turn on their masters without warning. Somewhere beneath the sewers, an ancient being has been waiting for heroes like you...
