

Twin Sands of Time

by Sean Sayrs · 1999

Your party of brave adventurers has run the gambit. From City of Bywater through Prelude to Pestilence, on to Assault on Giant Mountain and Griloch's Revenge. The Trouble in the Sword Lands was taken care of, the Necronomicon destroyed, and the Mithril Vaults conquered. You have seen it all in your days as an adventurer. What glory! Fabled victories in battle will be your legacy. Power and glory and the victory over evil and all it entails ring in the pages handed down from one generation to the next. A wonderful career. An even more wonderful retirement.

Now a new generation of young, foolish adventurers gathers to seek out the glory they have heard about from your legends past. A rag tag group of nothing but kids. Untested. Unproved. Eager to follow in the footsteps of their forefathers.

That chance has arrived. A message arrives to your town. A distant land across the Gargonian Sea has trouble. Big trouble. Orcs, goblins and their ilk have gathered in strength and are raiding the outlying towns and villages. The message begs of someone to gather together a group of heroes to help discover why these beasts have gotten so organized, and how? You recall a legend of two twins, born to be leaders of

the land, who recently in the dead of night disappeared mysteriously. It is not coincidence that the orcs and goblins rose in power and organization at the same time of the twins disappearance.

The message intrigues you. You have the chance to follow the path of your forefathers. Gather your friends in arms. Pack your bags and load up your horse. You are off to seek glory anew. You are off to write new pages in history with yourself as the hero. You are off to conquer these orcs and goblins and discover who or what is behind this threat. You are about to begin the adventure Twin Sands of Time.
